(last update: September 2026)

EDUCATION

M.Sc. Social Scientific Data Analysis | Lund University, Sweden

Sep. 2023 – Jun. 2025

Interdisciplinary programme focused on **quantitative**, theory-based data analysis. Emphasis on statistical methods, data handling (using R), and research design.

Thesis: [Social Infrastructure and Structural \(Dis\)advantage: A GIS-Based Equity Assessment](#)

B.A. Sociology (minor in Economics) | LMU Munich, Germany

2019 – 2023

Gained interdisciplinary experience in **sociology and economics**, with a strong foundation in social theory and the use of computational tools in empirical work.

Thesis: Assessing Public Perception of Sustainable Travel: A Reddit Analysis

EXPERIENCE

Methods Centre, Lund University, Sweden | Research Engineer

May 2026 – Now

Leading development of a research **data platform** for the Faculty of Social Sciences, enabling discovery and exploration of large datasets, via agentic engineering. Also leading a **quantitative research** project analyzing infrastructure investment patterns across Brazil at national scale, applying computational and ecological methods to large geospatial datasets.

Research Institutes of Sweden, Sweden | Master Thesis Student

Feb. 2025 – May 2025

Applied **GIS** to assess equity in access to social infrastructure in Skåne County, in collaboration with RISE, using road network-based accessibility metrics and geographically weighted regression (**GWR**).

Research Institutes of Sweden, Sweden | Research Intern

Aug. 2024 – Oct. 2024

Analysed and visualised spatial data for the City-Core Index project at RISE using **GIS in R**. Processed datasets, integrated **APIs**, and supported **data-driven** urban research.

Sociology Department, Lund University, Sweden | Project Assistant

Apr. 2024 – Dec. 2024

Used R to wrangle, analyse, and visualise clinical trial data from ClinicalTrials.gov, producing the dataset for the paper. Leading to academic research, resulting in **two outputs**: a [published paper](#) and a submitted manuscript pending review.

SKILLS

Programming: R (advanced), SQL (intermediate), Python (beginner), Agentic engineering (via VS Code)

Tools: Microsoft Excel (intermediate), Microsoft PowerPoint (intermediate), Microsoft Word (intermediate)

Language: English (fluent), German (native), Portuguese (native), Mandarin (pre-intermediate, HSK3)

R Programming: Data wrangling & visualization (tidyverse, ggplot2, dplyr), Regression (linear, logistic, mixed), ML (kNN, Naive Bayes, LDA, text/sentiment analysis), Web scraping (rvest, HTML, CSS, XPATH), GIS (sf, terra), Reporting (R Markdown, Quarto)

Certifications:

- Data Scientist Associate Certificate ([DataCamp](#)) in R
- SQL Associate Certificate ([DataCamp](#))
