EXPERIENCE

Research Engineer | Lund University, Methods Centre

Sweden | May 2026 - present

Leading development of a research data platform for the Faculty of Social Sciences, enabling discovery and exploration of large datasets through agentic engineering. Leading a quantitative research project on infrastructure investment patterns across Brazil at national scale, applying computational and ecological methods to large geospatial datasets.

Master Thesis Student | Research Institutes of Sweden (RISE)

Sweden | February - May 2025

Applied GIS to assess equity in access to social infrastructure in Skåne County, in collaboration with RISE, using road network-based accessibility metrics and geographically weighted regression (GWR).

Research Intern | Research Institutes of Sweden (RISE)

Sweden | August - October 2024

Analysed and visualised spatial data for the City-Core Index project using GIS in R. Processed datasets, integrated APIs, and supported data-driven urban research.

Project Assistant | Lund University, Sociology Department

Sweden | April - December 2024

Used R to wrangle, analyse, and visualise clinical trial data from ClinicalTrials.gov, producing a dataset that supported a published paper and a submitted manuscript pending review.

Fabio Schreiber

Education, methods and skills

EDUCATION

M.Sc. Social Scientific Data Analysis | Lund University

Sweden | September 2023 - June 2025

Interdisciplinary programme focused on quantitative, theory-based data analysis, statistical methods, data handling in R, and research design.

Thesis: Social Infrastructure and Structural (Dis)advantage: A GIS-Based Equity Assessment

B.A. Sociology, minor in Economics | LMU Munich

Germany | 2019 - 2023

Interdisciplinary training in sociology and economics, with a foundation in social theory and computational tools for empirical research.

Thesis: Assessing Public Perception of Sustainable Travel: A Reddit Analysis

METHODS AND TOOLS

Programming: R (advanced), SQL (intermediate), Python (beginner); agentic engineering via VS Code.

R and analysis: tidyverse, ggplot2, dplyr; linear, logistic, and mixed regression; kNN, Naive Bayes, LDA, text and sentiment analysis.

GIS and data collection: sf, terra; web scraping with rvest, HTML, CSS, and XPath.

Reporting: R Markdown, Quarto; Microsoft Excel, PowerPoint, and Word (intermediate).

LANGUAGES

German and Portuguese (native); English (fluent); Mandarin (pre-intermediate, HSK3).

CERTIFICATIONS

DataCamp Data Scientist Associate Certificate in R

DataCamp SQL Associate Certificate
